## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-20 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The prior art discloses a hybrid substrate made of an organic and ceramic substrate with circuit components, Oshima (US Patent 5936843), but does not disclose that the thickness of the ceramic substrate in a direction perpendicular to the first surface thereof being shorter than the length of the first surface thereof in a direction perpendicular to the interface as in the claimed invention. Furthermore there is no evidence in the prior art suggesting that making the thickness of the ceramic substrate in a direction perpendicular to the first surface thereof being shorter than the length of the first surface thereof in a direction perpendicular to the interface as claimed would be obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
